

Supplies and Schedule

SUPPLIES FOR WATER ROCKETS

- THREE 2 LITER BOTTLES PER STUDENT.
- TAPE – CLEAR PACKING TAPE OR DUCT TAPE,
- A STURDY MATERIAL LIKE CARDBOARD TO MAKE FINS
- SCISSORS USED FOR CUTTING THE BOTTLES AND TO MAKE FINS

When we get there we should:

- Set out supplies
- Introduce ourselves
- Tell them why we are there
- Let the kids know what our schedule will be for the day. (About 35 to 40 min. to build 20 min to launch.)
 - Start building
 - Have a person up front demonstrating what they should be doing.
 - Building should take the most time so thirty five to forty minutes
 - When the first few people are done have them help fill jugs of water
 - Have people help set up launcher
 - Once everyone's outside or wherever we are launching tell people about safety rules
 - Start launching
 - Post Flight Review
 - Clean up
